1 STALDZENE STEEP COASTLINE

Staldzene steep coastline runs for 6 km north of Ventspils, with a height of up to 8 m. Staldzene surprises with the uniqueness of unspoiled nature, magnificent sunsets and a pristine beach surrounded by pine forest. The cliffs of the shore, eroded by the waves of the sea, expose a variety of sediments formed during the Baltic Sea stages.

This beauty can be viewed from the **new viewing platform** or by following the gentle and **illuminated wooden footbridge all the way down to the sea**.

Seasonally, in winter and spring, you can see the only waterfall in the Baltics that flows out to sea. On the last Saturday of August, the traditional "Night of the Ancient Fire" event takes place.

3 LAKE BUŠNIEKS

You can enjoy the special natural beauty of **Lake Bušnieks** by walking or cycling along the 8 km long **nature trail** around the entire lake. The nature trail includes a 187-metre-long footbridge with a viewing platform for birdwatching, as well as a health trail with ten exercise benches. On the southern shore of Lake Bušnieks, there is a well-equipped bathing area with picnic areas and bicycle racks, while on the eastern shore there are seven stylised fish sculptures.
