

Creative workshop Hidraulikas inženieri (Hydraulic Engineers) at the Science Centre VIZIUM

Foto autors Ventspils Photo Archive

In March, every Saturday and Sunday at 1:00 PM, families, children, young people, and all other interested individuals are invited to participate in the creative workshop “Hydraulic Engineers.”
Did you know that water pressure can do great things? In the workshop, we will explore what hydraulics is and how it is used in everyday life, as well as create mechanisms that can lift and move objects. It’s a workshop where the whole family, working together, becomes real engineers.
