

# “Little Researchers’ Workshop: Health is in Motion” for preschool-aged children at the VIZIUM Science Centre

Preschool-aged children have the opportunity to participate in the “Little Explorers’ Workshops,” where, through games, play, and engaging in fun activities with cheerful instructors, they can not only have a great time but also develop new skills and gain knowledge.

This week in the Little Researchers’ workshop, we will create a movable gymnast out of cardboard that can “exercise” on a bar. This summery STEM activity develops creativity and understanding of the physics of motion, bringing joy and smiles.

The registration form can be found [here](#).
