

# “Little Researchers Workshop: Stone Transformations” for preschool children at the VIZIUM Science Center

Foto autors Ventspils Photo Archive

Preschool-aged children have the opportunity to participate in the “Little Explorers’ Workshops,” where, through games, play, and engaging in fun activities with cheerful instructors, they can not only have a great time but also develop new skills and gain knowledge. In the lessons, children will explore stones of different sizes, shapes, and colors, learning to compare them by their properties – smooth or rough, light or heavy, light or dark. After observing them, children will sort them and use them creatively in drawings, developing observation skills and sensory sensations. The registration form can be found [here](#).
