

Skiing Hill LEMBERGA HŪTE

Foto autors Ventspils tūrisma informācijas centra foto arhīvs

People of Ventspils have managed to build a hill, which they named after the long-time mayor of the city – “Lembergs’ Trilby”. The unique hill in the coastal lowlands of Western Latvia was built artificially from debris and discarded priming materials. At the moment it is 58 m high and the length of track is 240 m ,it have risen up every year.

In wintertime it pleases downhill skiers and snowboard fans who wants to enjoy their own special Snowboard Park and Cross-Country Skiing Track. It is real fun to ride down the Sledding Track for adults and children and the Tube Track. The operation of the hill is ensured by five ski lifts, five snow blowers and a snow tractor. The tracks are lit and during winter professional instructors will assist those who are not so sure about their skiing skills. Rental of skiing and snowboarding equipment is available at the foot of a hill.

In addition, everyone who visits has the opportunity to climb to the top of the mountain “Lemberga Hūte”, from where a unique view opens, which has been recognized as the Greatest View in Kurzeme in 2018.

When the weather is suitable for skiing, the hill is open every day.
