A multifunctional cycling track

Foto autors Ventspils novada pašvaldības foto arhīvs

Ventspils Municipality has created a brand new and modern active leisure park with an innovative pump track. The new cycling track adds to the range of sport opportunities for a wide target audience – riders of all ages and abilities, with means of transport such as bicycles, roller skates, skateboards and scooters.

The total length of the cycling track is 70.98 m, with widths of 2.0 and 3.0 m in places.

An information sign about the cycling track and its rules of use is installed at the entrance to the pump track to inform visitors and passers-by.
