

Tandem paragliding in Jūrkalne

Foto autors Ventspils Tūrisma informācijas centra foto arhivs

During Tandem paragliding flight the passenger chair is securely joined together with pilot's chair.
The paraglider is big enough to lift passenger and pilot with the max. weight of 110 kg.
To fly above the Jūrkalne steepcoast, the wind shoud come from the Sea with the speed of 5-8m/sec.
Flights are available during the warm weather of the season, when the wind strength and direction are appropriate.
One flight, which takes 20 minutes, costs €50.
